Using CPython 3.12.3 interpreter at: /usr/bin/python3.12
Creating virtual environment at: .venv
Resolved 221 packages in 277ms
   Built pybars4==0.9.13
   Built wikipedia==1.4.0
   Built pymeta3==0.5.1
Prepared 217 packages in 1m 12s
[0/217] Installing wheels... warning: Failed to hardlink files; falling back to full copy. This may lead to degraded performance.
   If the cache and target directories are on different filesystems, hardlinking may not be supported.
   If this is intentional, set `export UV_LINK_MODE=copy` or use `--link-mode=copy` to suppress this warning.
